

DID YOU KNOW?

APRIL 2024

PAVED AND UNPAVED TRAILS

Do you ever arrive to calls on a trail or dirt/gravel hiking path and struggle to find a property type that accurately describes the location?

STRUGGLE NO MORE!

Plus-1 codes have been created in the fire report to document incidents on **PAVED** and **UNPAVED TRAILS**.

Property

Property Use:

9381-Paved hiking/biking/walking trail (W&OD)

9311-Unpaved, dirt, or gravel hiking/biking/walking trail

If there's a mile or trail marker, be sure to document that in your narrative.

Why bother? Because documenting these locations allows for...

- Better understanding of access concerns
 - Do we need an ATV or heavy equipment to reach a patient?
- Resourcing dangerous locations in need of repair or re-engineering
- Training on the physical environments you respond to

DAD JOKE

Q: Why did the trail refuse to play hide-and-seek with the mountains?

A: They always peak!
