

DID YOU KNOW?

MARCH 2022

MRNs

Ever wonder what happens to the patient after handoff with the receiving hospital? DASM does! We've partnered with area hospitals to check-in on our transported patients to help *close the loop*. By obtaining a patient's final outcome we can:

- ✓ Give providers rapid feedback comparing their clinical impression with the hospital diagnosis;
- ✓ Tailor EMS continuing education training to the conditions of the patients we encounter;
- ✓ Make informed decisions about changes to EMS protocols, policies, and operations;
- ✓ Help maintain good relationships with area hospitals.

It's a much longer process if we don't have the patient's medical record number (MRN). Help us out by accurately recording the MRN in the ePCR for every transported patient.

An MRN is required for all transports. Additionally, a CSN is required for any transports to an Inova facility.

Receiving Facility Medical Record Number
