

DID YOU KNOW?

JUNE 2021

PROPERTY LOSS

Reporting property value and loss informs the FRD about the most severe types of fires, **shaping training and influencing resource allocation**. It can also affect a property owner's insurance claim.

If the property has **NO VALUE** (trash, uncultivated trees, etc.), then Losses will be **NONE** (same for contents).

Property Losses : 

If the property **HAS VALUE**, enter a dollar amount for Losses (same for contents). If the property suffered no loss or damage due to fire, smoke, water, or overhaul, enter \$0.

Property Losses : 

If the property loss is **UNKNOWN**, leave the Property Losses field **BLANK**.

QUICK RULES OF THUMB:

- ✓ If a Pre-incident Value has been entered, then Property Losses must also be recorded, even if \$0 (cannot be NONE).
- ✓ If Pre-incident Value is NONE, Property Losses must also be NONE (there can be no loss if there was no value).

FUN FACT

There's a *difference* between property loss of **NONE** (.) and a property loss of **ZERO DOLLARS** (\$0).
