

# DID YOU KNOW?

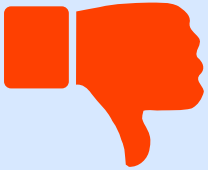

JUNE 2023

## MULTIPLE MEDICATION ADMINISTRATIONS

Combining multiple medication administrations into a single dose is improper documentation. Each administration of a medication should be recorded separately, noting the route, dosage, and response for each administration.

**Medications**

+ Add

Medication	
06/02/2023 08:52:52	Naloxone (Narcan)

Medication Given: **Naloxone (Narcan)**

Medication Administered Route:

Endotracheal Tube (ET)	Intramuscular (IM)	Intranasal (NASal)
Intraosseous (IO)	Intravenous (IV)	Portacath/ PICC

Medication Dosage: **8**

(4) administrations of 2mg doses recorded as a single 8mg dose

**Medications**

+ Add

Medication	
06/02/2023 08:53:16	Naloxone (Narcan)
06/02/2023 08:50:10	Naloxone (Narcan)
06/02/2023 08:52:52	Naloxone (Narcan)
06/02/2023 08:53:02	Naloxone (Narcan)

Medication Given: **Naloxone (Narcan)**

Medication Administered Route:

Endotracheal Tube (ET)	Intramuscular (IM)	Intranasal (NASal)
Intraosseous (IO)	Intravenous (IV)	Portacath/ PICC

Medication Dosage: **2**

(4) administrations of 2mg doses recorded as (4) 2mg doses

## IMPACT

### CONTINUATION OF CARE

- Provides an accurate picture of pre-hospital care which informs next steps (and reduces audits and amendments to the ePCR)

### RESTOCKING

- Helps EMS logistics restock efficiently (so apparatus are properly equipped for the next call)
