

# DID YOU KNOW?

APRIL 2022

## EMS CPR (BY FRD PROVIDER)

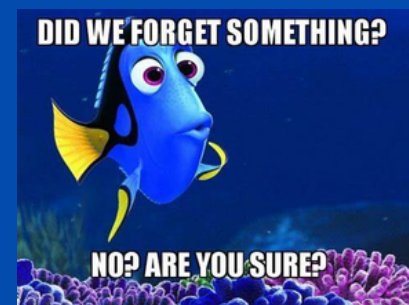

One of the ways we measure the impact of our work is through the Life Years initiative. By resuscitating someone in cardiac arrest, we help that patient have many more years of life. Toward the end of constant improvement, we are actively looking for ways where we can make a difference, such as:

- ✓ Encouraging bystander CPR and AED;
- ✓ Obtaining feedback and outcome from hospitals;
- ✓ Identifying patients meeting Life Years criteria

One way we identify a potential Life Years patient is in the cardiac arrest panel using answers to the resuscitation by EMS questions. If EMS (FRD provider) attempted resuscitation, select all applicable fields in the multi-select *Type of Resuscitation Attempted by EMS* field.

|   |  |   |  |
|---|--|---|--|
| Resuscitation Attempted by EMS :        | <input type="button" value="No"/>                            | <input checked="" type="button" value="Yes"/>                   |  |
| Type of Resuscitation Attempted By EMS: | <input type="button" value="Attempted Defibrillation"/>      | <input checked="" type="button" value="Attempted Ventilation"/> | <input checked="" type="button" value="Attempted Chest Compressions"/> |
|   | <input type="button" value="NOT Attempted - Obvious Death"/> | <input type="button" value="NOT Attempted - Valid DNR/ POST"/>  | <input type="button" value="NOT Attempted - Patient Not In Arrest"/>   |
