

# DID YOU KNOW?

OCTOBER 2022

## DRIVER'S LICENSE SCANNING

There's an easy and quick way to upload a patient's identification information and reduce errors.

1. After obtaining the patient's driver's license, use the “**Driver's License 2D Scanner**” and device camera to scan the ID.

The screenshot shows a 'Patient Info' form with fields for First Name, Middle Initial/Name, Last Name, Gender, and Birth Date. A yellow arrow points to the 'Driver's License 2D Scanner (iOS Camera)' option, which is highlighted with a yellow box.

2. Once the ID has been scanned, patient information will auto populate.

**\*Verify and click “Ok”**

The screenshot shows a 'Parsed Barcode Data' window with a table of patient information. The table has two columns: 'Elite Fields' and 'Barcode Values'.

Elite Fields	Barcode Values
First Name	Big
Middle Initial/Name	B
Last Name	Bird
Patient's Date of Birth	12/31/1970
Age	51
Age Units	Years

At the bottom of the window are 'Cancel' and 'OK' buttons.
