

DID YOU KNOW?

JANUARY 2024

NFIRS INCIDENT TYPE & ePCR DISPOSITION

‘**INCIDENT TYPE**’ in the **NFIRS** report

and

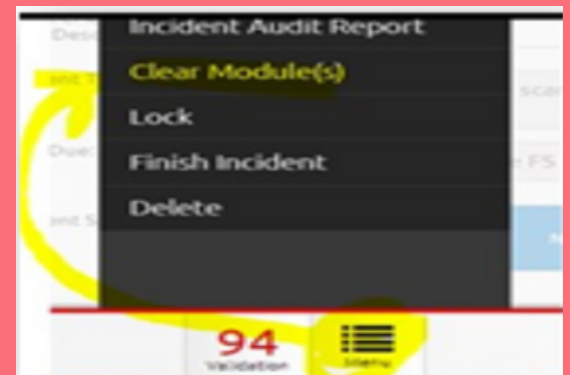

‘**DISPOSITION**’ in the **ePCR**

Incident Type: [!]
First Due: Find value...
111-Structure - Building fire

Disposition: [!]
Incident Number: Find value...
Treated & Transported

Always make these selections **FIRST** because:

- The visible and required fields in the **NFIRS** report and **ePCR** are driven by the selected incident type and disposition, respectively.
 - Some fields are required by **NFIRS/OEMS/NEMESIS** to be BLANK for a given *incident type* or *disposition*. Changing the *incident type* or *disposition* may hide these fields that need to be BLANK, triggering **validation errors**.
- If you change the incident type in the NFIRS report after it has been started, go to Menu > Clear Modules to reduce the likelihood of validation errors.

DAD JOKE

Q: Wanna hear a joke about paper?

A: Nevermind, it's tearable
