

UNLOCKING NFIRS REPORTS

Have you received an email about something incorrect in your NFIRS report?

Example: Incorrect dispositions on an elevator call

NFIRS incident type correction for E2...

Who to contact to unlock and why?

1st Choice: Battalion Chief (BC)

- · Make sure they are notified and aware of the situation
 - If BCs notice recurring issues within their battalion, they can provide targeted training.
- Works the same schedule as you (24-hour shifts)
 - If fire reports are unlocked as soon as the issue is identified, they pop back up on DIRTS. Consequently, someone may relock the report before you return to work and have a chance to correct it.
 - As such, it's easier logistically for you to contact your BC to unlock it while you're working.

2nd Choice: Incident Report Coordinator

- Is happy to help, but response may be delayed (other staff obligations, nights/weekends/etc.; it's a daywork position)
- It's reasonable to reach out when your BC is unavailable (EMSCEP, OARS, etc.) or when you have a question about what needs to be corrected.

☐ This Incident is read-only and locked. You may still change the status of this Incident.

DAD JOKE

Q: Why are there no knock knock jokes about America?

A: Because... Freedom rings!!
